

- > dry contact relays (Automation Systems)
- > momentary paddle switch

Connectors: > For connecting infrared/switch/BUS cables

B				PIN
Black	LED	3		
Red	GND	4		
Green	OPEN	5		
Yellow	CLOSE	6		

RJ45

Connect wires necessary only

Switching

- > **Open** and **Close** should not be activated simultaneously. If so, the motor unit will switch to the programming mode.
- > pulse < 1.2 sec: automatic complete open / close / stop
- > pulse < 1.2 sec: the system runs until button is released
- > Bounce time lower than 0,04 sec required
- > The switching current is +/- 5.5mA
- > 24 VDC out pin2 and pin4: max. 2.4VA
- > Potential free switching only

24 VDC Power Supply

6230-1100 6230-1200-US

LED > Lights up in green or red

- > Gives feedback while programming the motor unit: see annexe B4 for an overview of the LED signals.
